Sample Yield Scheme Clause: Mid-Season Adversity, Kharif 2023

SAMPLE DOCUMENT - ILLUSTRATIVE ONLY. Not issued by any insurer, bank or government body. Figures are invented for software testing and must not be used for real claims.

Scope

Scheme: area yield based crop insurance, modelled on the Pradhan Mantri Fasal Bima Yojana (PMFBY) operational guidelines.

Crops covered: Paddy, Maize and Cotton. Season: Kharif 2023, 1 June 2023 to 30 September 2023.

Sum insured: Rs. 55,000 per hectare for Paddy, Rs. 45,000 per hectare for Maize and Rs. 70,000 per hectare for Cotton.

1. Prevented sowing

1.1 Where at least 75 percent of the sown area could not be sown owing to deficit rainfall, an indemnity of up to 25 percent of the sum insured is payable and cover ends.

2. Mid-season adversity

2.1 Mid-season adversity may be declared when the seasonal rainfall deficit is 50 percent or more of the normal.

2.2 On declaration, an on-account payment of up to 25 percent of the sum insured is made, adjusted against the final claim.

3. Final claim

3.1 The final claim is computed from crop cutting experiments as (threshold yield - actual yield) / threshold yield x sum insured.
